For the 1994-1995 school year, the data indicate that 100% of the WBO Standard Student Achievement Program (SAP) students in the state of North Carolina met or exceeded the state standard for mathematics. This is a significant improvement over the 1993-1994 school year, when only 85% of the students met or exceeded the state standard. The data also indicate that the average score for the state was 85% in 1993-1994 and 100% in 1994-1995. This indicates that the state has made significant progress in improving student achievement in mathematics.
